

Amoeba Sisters Video Recap: Comparing Cell Types Review

In the bonus round of our Amoeba Sisters *Comparing Cell Types Review* video, you are asked to complete the empty boxes in this chart. The terms in the empty boxes are mentioned at some point the video (though some you may have to think about). Can you complete them? They are revealed at the end of the video for you to check your understanding! **EXTENSION:** On the next page, share anything you might know about these categories that isn't in the chart!

GENERAL CELL TYPE

	 ARCHAEAL CELL	 BACTERIAL CELL	 PROTIST CELL	 FUNGAL CELL	 PLANT CELL	 ANIMAL CELL
	Archaeal	Bacterial	"Protist"	Fungal	Plant	Animal
Cell Membrane?	Yes			Yes		
Cell Wall?	Yes		Some			
Prokaryotic or Eukaryotic?		Prokaryotic		Eukaryotic	Eukaryotic	
Autotrophic or Heterotrophic?	Can be either	Can be either	Can be either		Autotrophic	
Makes Up Unicellular or Multicellular Organisms?			Both (mostly unicellular organisms)	Both (mostly multicellular organisms)	Multicellular organisms	

*Chart is general. A few exceptions can exist to the above as biology is full of fascinating exceptions.

Amoeba Sisters Video Recap: Comparing Cell Types Review

EXTENSION: Do you know any other characteristics about any of the cell type categories that aren't from the video's chart?

Maybe you know some example organisms that have these cell types? Maybe you know some fascinating exceptions? Write them in below!

Characteristics or Exceptions Not Mentioned in the Video:

Archaeal	Bacterial	"Protist"	Fungal	Plant	Animal
