

Name: _____

Amoeba Sisters Video Recap: Photosynthesis and Cellular Respiration

NOTE: This recap compares two Amoeba Sisters videos: photosynthesis and cellular respiration.

1. In photosynthesis, what are the two major reactions that take place? • _____ • _____ FOR GREAT GLUCOSE! 	2. Where do each of these reactions take place? • _____ • _____ 
3. In aerobic cellular respiration, what three major steps are involved? • _____ • _____ • _____	4. Where do each of these three major steps take place (for eukaryotes)? • _____ • _____ • _____ 

For the following formulas, (1) determine whether the formula is photosynthesis or cellular respiration, (2) circle the products, and (3) creatively illustrate each reactant or product in the box underneath.

5. Formula is for: _____

6. Formula is for: _____

Amoeba Sisters Video Recap: Photosynthesis and Cellular Respiration

If Chloroplasts and Mitochondria Could Speak

If chloroplasts and mitochondria could only speak! Decide whether each quote could be stated by a chloroplast (label "C"), mitochondria (label "M"), or both organelles (label "C, M").

7. ____ My main goal is to produce a lot of ATP energy.

8. ____ I contain pigments to help capture light energy.

9. ____ Oxygen gas production will happen within me.

10. ____ I can be found in plant cells.

11. ____ I can be found in animal cells.

12. ____ Carbon dioxide gas production will happen within me.

13. ____ Muscle cells would contain a lot of me.

14. ____ Water production will happen within me.

15. ____ Glucose production will happen within me.

16. ____ I would be found within a photosynthetic plant.

17. ____ I am the site of aerobic cellular respiration.

18. ____ Krebs and the Electron Transport Chain both happen within me.

19. ____ I contain chlorophyll.

20. ____ The Calvin Cycle happens within me.
